[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Computer Science (Software Engineering) graduate from UMPSA with full-stack web development internship experience at PKINK. Proficient in building robust Laravel applications, dynamic data-driven JavaScript tools and automated workflow scripts. Proven ability to architect decoupled systems, optimize database workflows and enhance open-source codebases to deliver clean scalable software solutions.

PROJECTS

Corporate Asset Management and Loan System

Laravel,MySQL,Blade

- Designed and developed a *full-stack* platform using Laravel to streamline and automate hardware distribution and inventory workflows replacing manual paper forms.
- Implemented Role-Based Access Control (RBAC) using Laravel built-in authentication system to secure sensitive company data.
- Built efficient data management (CRUD) modules to track asset loan status, returns, ownership and maintenance in real time.

JSON Configuration-Driven Link Aggregator Application

HTML,JavaScript | [GitHub](#) | [Demo](#)

- Developed a configuration-driven static web application to isolate presentation logic from user profile data.
- Optimized the application structure for lightweight self hosting, specially tailored for platforms like GitHub Pages.
 - Enabled direct content and layout updates via JSON file edits, eliminating compilation dependencies.

Desktop Dashboard and Productivity Application

Python,Qt6 | [GitHub](#)

- Developed a multi-functional desktop application using PyQt6 that integrates a link manager, system clock, Pomodoro timer and built-in audio player.
- Designed a responsive user interface (UI) and optimized memory management to ensure smooth background application performance.

University Web Portal Auto-Login Browser Extentsion

JavaScript,WebExtensions API,HTML | [GitHub](#)

- Forked and upgraded an open-source codebase to scale auto-login support from a single website to all official UMPSA university portals.
 - Designed a new popup UI component allowing users to access navigation quick-links directly from browser extension.
- Optimized conten script matching logic to ensure accurate credential autofill across distinct URL domains.

WORKING EXPERIENCES

Perbadanan Kemajuan Iktisad Negeri Kelantan (Internship)

March 2026 – August 2026

TECHNICAL SKILLS AND LANGUAGES

Programming Language

PHP | Python | JavaScript | HTML5 | CSS3 SQL

Framework and Library

Laravel | PyQt6 (Qt6) | WebExtensions API | Blade Engine| Unity3D

Database and Tools

MySQL | JSON Schema | Git | GitHub | GitHub Pages

Operation System

Linux (Debian) | Windows | Armbian (Orange Pi ARM SBC)

Language

Malay, English| Fluent

Japan, Mandarin, Arabic, Korean, Spanish | Basic Level

COCURRICULAR EXPERIENCES

PEKA 5 UMP 2021/22

Multimedia Committee Member

Committee for Karnival Mega Residen Pelajar

Enactus UMP Club 2020/21

Multimedia Executive Committee

NEX:US The Link to Social Impact organized by Enactus UNM (Semi-final)

EDUCATIONS

**Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) | Pekan,
Pahang**

Bachelor Degree Computer Science(Software Engineering) with Honors| 2026

Kolej Matrikulasi Kelantan | Pasir Puteh, Kelantan

Marticulation Certificate – Life Science | 2019
